

Microsoft Business Productivity Online Suite

Microsoft Online Services
from Zipper by Enfo

Zipper ZervicePoint

Microsoft BPOS

Zipper extend the Microsoft BPOS offer

As a Microsoft Gold Certified Partner, Zipper specializes in consulting and design services aimed at delivering dynamic infrastructures based on Microsoft technology to large and midsize enterprises. Our goal is to help organizations to achieve desktop and server computer efficiencies using Microsoft® software.

Zipper by Enfo also develops and sells its own IT management portal solutions based on Microsoft Office SharePoint® Server 2007 and other Microsoft technologies under the concept named ZervicePoint.

We are helping customers with large software implementations and platforms and often get the question about hosted solutions to reduce IT investments. To help customers and broaden its own business, Zipper have just began to offer the Microsoft Business Productivity Online Standard Suite.

Deploying Microsoft Online Services is much faster than deploying the same solutions on premises, which helps Zipper accelerate overall business velocity. "The time" required to set up software with Microsoft Online Services versus on premises goes way down, from weeks to hours.

About Microsoft BPOS

Microsoft Online Services is a business-class communications and collaboration software offering delivered as a subscription services, hosted by Microsoft, and sold with partners. These services help make it easier for customers to rapidly and cost-effectively access the most up-to-date technologies, and are designed for rapid deployment to provide customers with streamlined communications, simplified management, and business-class reliability and security.

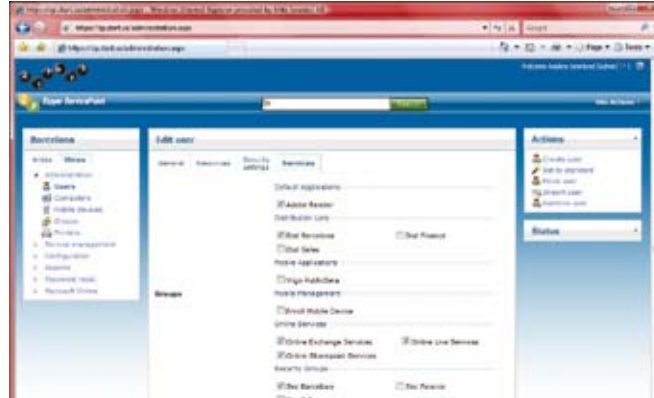

When Zipper learned about the Microsoft Business Productivity Online Standard Suite, it knew it had found the answer to many of these problems. The Business Productivity Online Standard Suite is a set of subscription-based communications and collaboration services hosted by Microsoft and sold through partners. It includes:

- Microsoft Exchange Online, which provides desktop and mobile e-mail messaging, calendaring, and contacts.
- Microsoft SharePoint Online, which provides shared Web-based workspaces for collaboration and document-sharing.
- Microsoft Office Live Meeting, which provides audio and video Web-conferencing solutions.
- Microsoft Office Communications Online, which provides instant messaging and presence capabilities.

Zipper added services & solutions to BPOS

To manage the online services in Microsoft BPOS in a more efficient way, Zipper have added BPOS functionality to ZervicePoint Portal 2008 like workflow approvals creating accounts, a delegation model and enduser self-service portal.

The idea we see with ZervicePoint and BPOS is to be able to manage the cloud and the local company Active Directory in the same way and from a single administration point.

ZervicePoint Portal 2008 for BPOS

ZervicePoint is a SharePoint based webportal for corporate infrastructure management – and there are a couple of add-on modules like SCCM, Password Reset, SCMDM, Live@edu and more.

Zipper services for BPOS

Zipper offers and resells the Microsoft BPOS service and besides of that we are also offering a couple of attached services to BPOS:

- BPOS Workshop
- Project Management
- Prepare, migrate and maintain a BPOS environment
- Network infrastructure like DNS, MX Entries and access.
- User and Mail migration to BPOS.
- OCS, SharePoint & Office knowledge
- BPOS Admin tasks
- Helpdesk for Microsoft Online Services
